

KUBUS Premium Range

KUBUS

Kubus is the new line of modular showcases: original and unique, it nails the strength of aluminium, the plainness of the slimmest bearing profile ever seen, the lightness of thinner tempered glasses and the modernity of the internal LED strip lighting system, very impressive and practical.

Modularity is simple and easily understood: thanks to simple magnetic hooks hided in frame angles it's possible to join all models with a fast click, creating a huge range of expositive scenery, without any change of the integrated electrical system.

MAIN FEATURES - STANDARD MODEL
