## Displays of Distinction

All prices quoted exclude VAT

We supply an unbeatable range of LED display products which are manufactured in the UK. You cannot buy better quality LED display products at these prices elsewhere.

This smart design with Standard or Micro Bevell, means no dark shadow and an even distribution of light.

We use maintenance free low energy LED's with a minimum life expectancy of between **30,000** and **60,000** hours.

**No specialist electrical installation is required.**

The LED's are powered using a 12 volt transformer that plugs directly into the mains.

We are so proud and confident of the quality of these light panels that every **LED LightPocket** we sell comes with a **12 month warranty**.

*We recommend using Back-Lit film in our LED displays which will provide for the Ultimate Light Panel effect.*
