66cm x 33cm x 33cm

**KL36**  
ASSEMBLED €525 + VAT

### **The KUBUS Range**

A unique and original line, with the thinnest profile ever. Assembling units is easy and intuitive: with simple magnetic docks hidden inside the joints it is possible to stack all the units with a simple click, realizing a huge range of possibilities, without any need to work on the built-in electrical system.

The lighting system is innovative and invisible, made of LED strip lights hidden inside the aluminium frame.

No cables, just beams of pure and continuous light.
